REINFORCED SIDEWALLS FOR HIGH CUT RESISTANCE
VERSTÄRKTE SEITENWAND, HOHER SCHUTZ GEGEN SCHNITTE

TRACTION LUG
PROFILRILLEN

M3HA is the most versatile radial tyre by ECOMEGA with a non-directional tread pattern design. Suitable for loaders. The right tyre for the harshest conditions, such as sand, rock, soft soil and mud. Excellent traction and stability, maximum comfort for the operator. Stable, smooth and silent ride. Thanks to the large footprint and the square shoulders the tyre provides a regular load dispersion on the ground, maximum traction on soft soil and great mobility on all grounds. Excellent for front loaders fitment, for quarry applications and all other underfoot conditions.

- ☑ tyre suitable for loader applications
- ☑ Non-directional pattern to reduce vibrations
- ☑ Optimal traction on all grounds,
